

Feb 12

Roles & goals will become more evident as we progress

- Equity?
 - Amount of effort and time should be reflected
- Pay?
- TBD once we collect sufficient data

Costs

- Fixed fee + 50, 75, 100 per delivery (sm, md, lg)
- 5-6 per day on average

Ask the construction companies how many deliveries per week they would likely need?

Ideal Customer Profile

- of driver
 - Dedicated?
 - When around?
 - With time slots?
 - Retiree?
 - Every other day? Every day?
 - Only get it same day if you order by 2
 - Might need to negotiate with driver & there
- of company

How many companies are doing projects per 50 sq miles

Low Code

- do it with Stephen's company exclusively & his son

We need to have a rehearsal, an onboarding with the Mitchells, and a first live with the Mitchells

Dry Run

Construction Company 🏗️ (Joe)

Dispatcher 📞 (Stephen)

Driver 🚚 (Anthony)

Tie Breaker 🛠️ (Nathan)

Pick a day for rehearsal

- Among ourselves

- ☐ Run book per persona
- ☐ We need to create a payment account

- Tie breaker who makes sure the we don't get stuck on a debate

Overarching Runbook - OLD

Construction Company 🚧 (Fix Home Projects - Sean Mitchell)

Dispatcher 📞 (Stephen)

Driver 🚚 (Ryan Mitchell)

1. 🚧 Find the Part(s)

- User searches lowes or home depot website for the local store and fills the cart with needed items

2. 🚧 Place Order

- things.dispatch@gmail.com
- deliveryapp123!

3. 📞 Receive Order

- Enter order data in master google spreadsheet
- https://docs.google.com/spreadsheets/d/13Xql6R0PuCT4YzJOmN_xF803cyd4iOemALhnR6CHTeU/edit?usp=sharing
 - The spreadsheet has some inherent limitations. IE: Doesn't allow for a complex data structure by default
- Set "Received Status"

4. 📞 Categorize Order

- Capture order details (item numbers, store, aisles, etc)

5. 📞 Request Delivery Address

- Reply to customer to share details and get delivery address
- Set "Delivery Address Requested"

6. 🚧 Provide Address & Validate Order

- User views validates items
- Responds with address (act of confirmation)

7. 📞 Calculate Fee(s)

- TBD
- We need to sort out the fee structure and calculation.

8. 📞 Find Agent

- Dispatcher copies relevant order rows into a new tab on the master spreadsheet.
- Click "Move to new sheet" on the tab.
- Opens new sheet and renames to capture order details "Customer and Date and Order Number"
- Copies spreadsheet link
- Sends message in #drivers channel with some details and spreadsheet link
- https://join.slack.com/t/quickconstruc-qih9119/shared_invite/zt-3ohe5trh1-lJgaxqfNMSdXO6KSWZu7Xw
- Set "Driver Requested"

9. 🚚 Receive Order

- Driver Accepts job in slack by replying in a thread to the job notification
- 📞 Dispatcher
 - Set "Driver Found"

10. 📞 Confirm Order Total with Construction Site

- Send email/message with Details

11. 🚧 Confirm Pricing Acceptance

- Respond to message with acceptance

12. 📞 Dispatcher Driver

- Send message to Driver in thread to proceed.

13. 🚚 Arrives at Store

- Driver updates thread in slack
- 📞 Dispatcher
 - Set "Driver At Store"

14. 🚚 Purchases Items

- Driver updates thread in slack with receipt image
- 📞 Dispatcher
 - Set "Items Purchased"

15. 🚚 Items En Route

- Driver updates thread in slack
- 📞 Dispatcher
 - Set "Driver En Route"

16. 🚚 Delivery

- Driver updates thread in slack with image
- 📞 Dispatcher
 - Set "Delivered"

17. 🚧 Double check all desired items delivered

18. 📞 Request Payment

- Dispatcher send message to customer with delivery image and picture of receipt
- Send Payment Link
 - Create Payment Account
- Set "Payment Requested"

19. 📞 Request Payment

- Set "Order Final"

Customer Guide

If the process has hiccup, contact Stephen at: 864-346-8066

1. Fill Cart (on Lowes or Home Depot)

- DO NOT PURCHASE. YOU WILL SEND US THE CART
- Customer searches lowes or home depot website for the local store and fills the cart with needed items
- ENSURE ALL ITEMS ARE AVAILABLE FOR IMMEDIATE PICKUP AT YOUR STORE

2. Place Order

- **Use the share cart feature and send to:** things.dispatch@gmail.com

3. You will receive (a phone call) email from us with:

- Material items & their cost
- Sizing fee
- Delivery mileage radius fee chart
- Request for delivery address
- Request for phone number if you want text updates
- Request delivery instructions

4. Agree to cost & provide address & phone number & instructions

- Customer views & validates items
- Responds with address (act of confirmation)

5. Order Confirmation

- We're so happy you've selected our service
- We will have it delivered by EOD

6. ON THEIR WAY

- After the items have been purchased, you will receive a message (text or email) from the driver stating they are on their way
- after they've purchased the items and they are on their way

7. DELIVERY

- Check that all items are there
- You will receive a message with a picture of the delivery

8. You will receive a payment link

Dispatcher Guide

THIS PERSON NEEDS TO HAVE EMAIL NOTIFICATIONS ON AND SET TO LOUD

1. Receive Order

- ☐ You will receive an email. Click View Cart in the email to see order details and store location
- ☐ Enter order data in master google spreadsheet
- ☐ https://docs.google.com/spreadsheets/d/13Xql6R0PuCT4YzJOmN_xF803cyd4iOemALhnR6CHTeU/edit?usp=sharing
- ☐ Capture order details (item numbers, store, aisles, etc)
- ☐ Refer to pricing charts
- ☐ Set "Received" Status

2. Find Driver

- ☐ Dispatcher copies relevant order rows into a new tab on the master spreadsheet.
- ☐ Click "Move to new sheet" on the tab.
- ☐ Move that new sheet in the delivery app folder
- ☐ Opens new sheet and renames to capture order details "Customer and Date and Order Number"
- ☐ Set link to public (later we should have driver's group)
- ☐ Sends message in #drivers channel:
 - 🚨 Driver Needed. Details in Thread 🚨
- ☐ Copy spreadsheet link and paste into sheet
- ☐ https://join.slack.com/t/quickconstruc-qih9119/shared_invite/zt-3ohe5trh1-IJgaxqfNMSdXO6KSWZu7Xw
- ☐ Set "Driver Requested"

3. Once a driver accepts, set status to "Driver Found"

- ☐ Put a ☒ icon on the thread so other drivers know it's taken care of
- ☐ ALL COMMUNICATION MUST BE IN THE SAME THREAD

4. Send order details to customer

- ☐ Use email template
 - Material items & their cost
 - Sizing fee
 - Delivery mileage radius fee chart
 - Request for delivery address
 - Request for phone number if you want text updates
 - Request delivery instructions
- ☐ Set status to "Delivery Address Requested"

5. Dispatch Driver

- ☐ After the customer has confirmed the order details and provided the address...
- ☐ Send message to Driver in thread to proceed & include the delivery details

6. Update Statuses in google sheet as the driver communicates updates

7. Request Payment

- ☐ After the driver says it's been delivered

Driver Guide

1. Get message in slack

- A requested delivery will be posted in slack. These details will be there:
 - Material Items (delivery method/size)
 - Truck, flatbed, rack, etc
 - Store location
 - Driver payment amount
 - Customer address
- Review details and post a message if you want to take the delivery
- ALL COMMUNICATION ABOUT THIS DELIVERY MUST BE IN THE SAME THREAD

2. Agree to Delivery

- Say "I'll take it" in the thread
3. Dispatcher will notify you once the customer has agreed
 4. Post statuses in Slack thread:
 - Arrives at Store
 - After loading items into vehicle, post image of receipt
 - Delivery, post image of delivery
 5. GET PAID!!

- 20. 🚧 Order Confirmation
 - We're so happy you've selected our service
 - We will have it delivered by EOD

Feb 19 Dry run

- ☐ What about taxes?
- ☐ Dispatcher needs to be logged out of home depot and when viewing product pages - ensure the correct store is selected
- ☐ Dispatcher should double check all products are available
- ☐ What should the quantity and price cells say in the spreadsheet?
- ☐ For now - we're going to assume drivers are willing to agree to a delivery even if they don't know the distance up front and therefore we don't need to have the address
 - ☐ (I think we should list a range of what the payout would be)
- ☐ Create spreadsheet with customer contact information
- ☐ We need an email template

- ☐ Copying over the sheet was confusing. Instructions could be more explicit:
 - Create new tab
 - Copy over headers
 - Copy over data
 - Skipped step for moving
